A

Mini-project Report On

CAFE MANAGEMENT SYSTEM

A mini-project report submitted in partial fulfillment of the requirements for the award of the degree
of

Bachelor of

Engineering In

ARTIFICIAL INTELLIGENCE AND DATA SCIENCE

Submitted By:-

Adarsh (3DG22AD002)

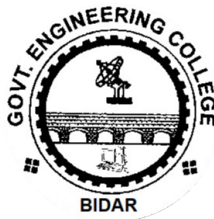

K.Raj (3DG22AD020)

Dnyaneshwar (3DG22AD014)

Shravya(3DG22AD048)

Under the Guidance:

Prof. Upasana Patil

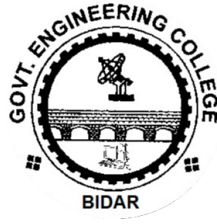

Government Engineering College, Bidar

Gandhi Nagar, ITI campus, Mailoor road

DEPARTMENT OF ARTIFICIAL INTELLIGENCE & DATA SCIENCE

CERTIFICATE

This is to certify that the mini project topic entitled “Café Management System” been successfully carried out by **Adarsh (3DG22AD002)**, **Dyaneshwar (3DG22AD014)**, **K.Raj (3DG22AD02)**, **Shravya (3DG22AD048)** a Bonafide work carried out by us at **Government Engineering College** partial fulfillment of requirements for the award of degree in **Bachelor of Engineering of Artificial Intelligence and Data Science Engineering of Visvesvaraya Technological University**, Belagavi during academic year **2024-2025**. The mini project report approved, satisfies the academic requirements in respect of mini project activity for the said degree.

GUIDE

HOD

Principal

ACKNOWLEDGMENT

The satisfaction we feel at the successful completion of my Mini project, “**Café Management System**” would be incomplete if we did not mention the people, whose able guidance and, crowned efforts with success. It is our privilege to express our gratitude and respect all those who inspired and helped us in the completion of my/our mini project. All the expertise in this mini project presentation belongs to those listed below.

We express our sincere thanks to our beloved Principal [Dr. Devendra Hanche](#), GEC, Bidar for giving me/us an opportunity to carry out my academic mini project report.

We are greatly indebted to HOD, [Prof. Jagadevi Mehtre](#), Artificial Intelligence & Data Science Department, GEC, Bidar for facilities and support extended to us.

We express our deepest gratitude and thanks to my guide Assistant, [Prof. Upasana Patil](#) GEC, Bidar for giving her valuable cooperation and excellent guidance in completing the mini project.

We express our sincere thanks to all the teaching & non-teaching staff of Artificial Intelligence & Data science Department and our friends for their valuable cooperation during the development Finally.

We convey our sweet thanks to our beloved parents who supported us to pursue higher studies and providing us a pleasant environment at home to complete the mini project report in time.

Place: Bidar

DECLARATION

This is to declare that the Dissertation work entitled “Café Management System” is a Bonafede work carried out by **Adarsh (3DG22AD002), Dnyaneshwar (3DG22AD014), K.Raj (3DG22AD020), Shravya (3DG22AD048)** at **Government engineering college, Bidar** in the partial fulfillment of the requirements for the award of the degree of **Bachelor of engineering in Artificial Intelligence and Data Science engineering of Visvesvaraya Technological University, Belagavi**. Under guidance of **Asst. Prof. Upasana Patil**, Government engineering college Further it is declared best of our knowledge that the work reported here in, does not form part of any other thesis dissertation on the basis of which any other candidate was conferred a degree or award on earlier occasion.

ABSTRACT

The Cafe Management System is a Python-based software application designed to streamline the operations of a cafe or restaurant. This system provides an efficient and user-friendly platform for managing essential tasks such as menu creation, order processing, bill generation, and sales tracking.

By leveraging Python's simplicity and robustness, the system ensures smooth integration of functionalities and scalability for future enhancements. Key features include the ability to add, modify, or delete menu items, take and manage customer orders, compute bills with applied taxes, and generate sales reports for financial analysis.

This system can be implemented as a console-based application for simplicity or enhanced with a graphical user interface (GUI) using libraries like Tkinter or PyQt. It is designed to save time, reduce human error, and improve customer satisfaction through efficient service delivery. The Cafe Management System is an ideal solution for small to medium-sized cafes seeking to modernize their operations and achieve greater productivity with minimal investment
